

Fig. S2

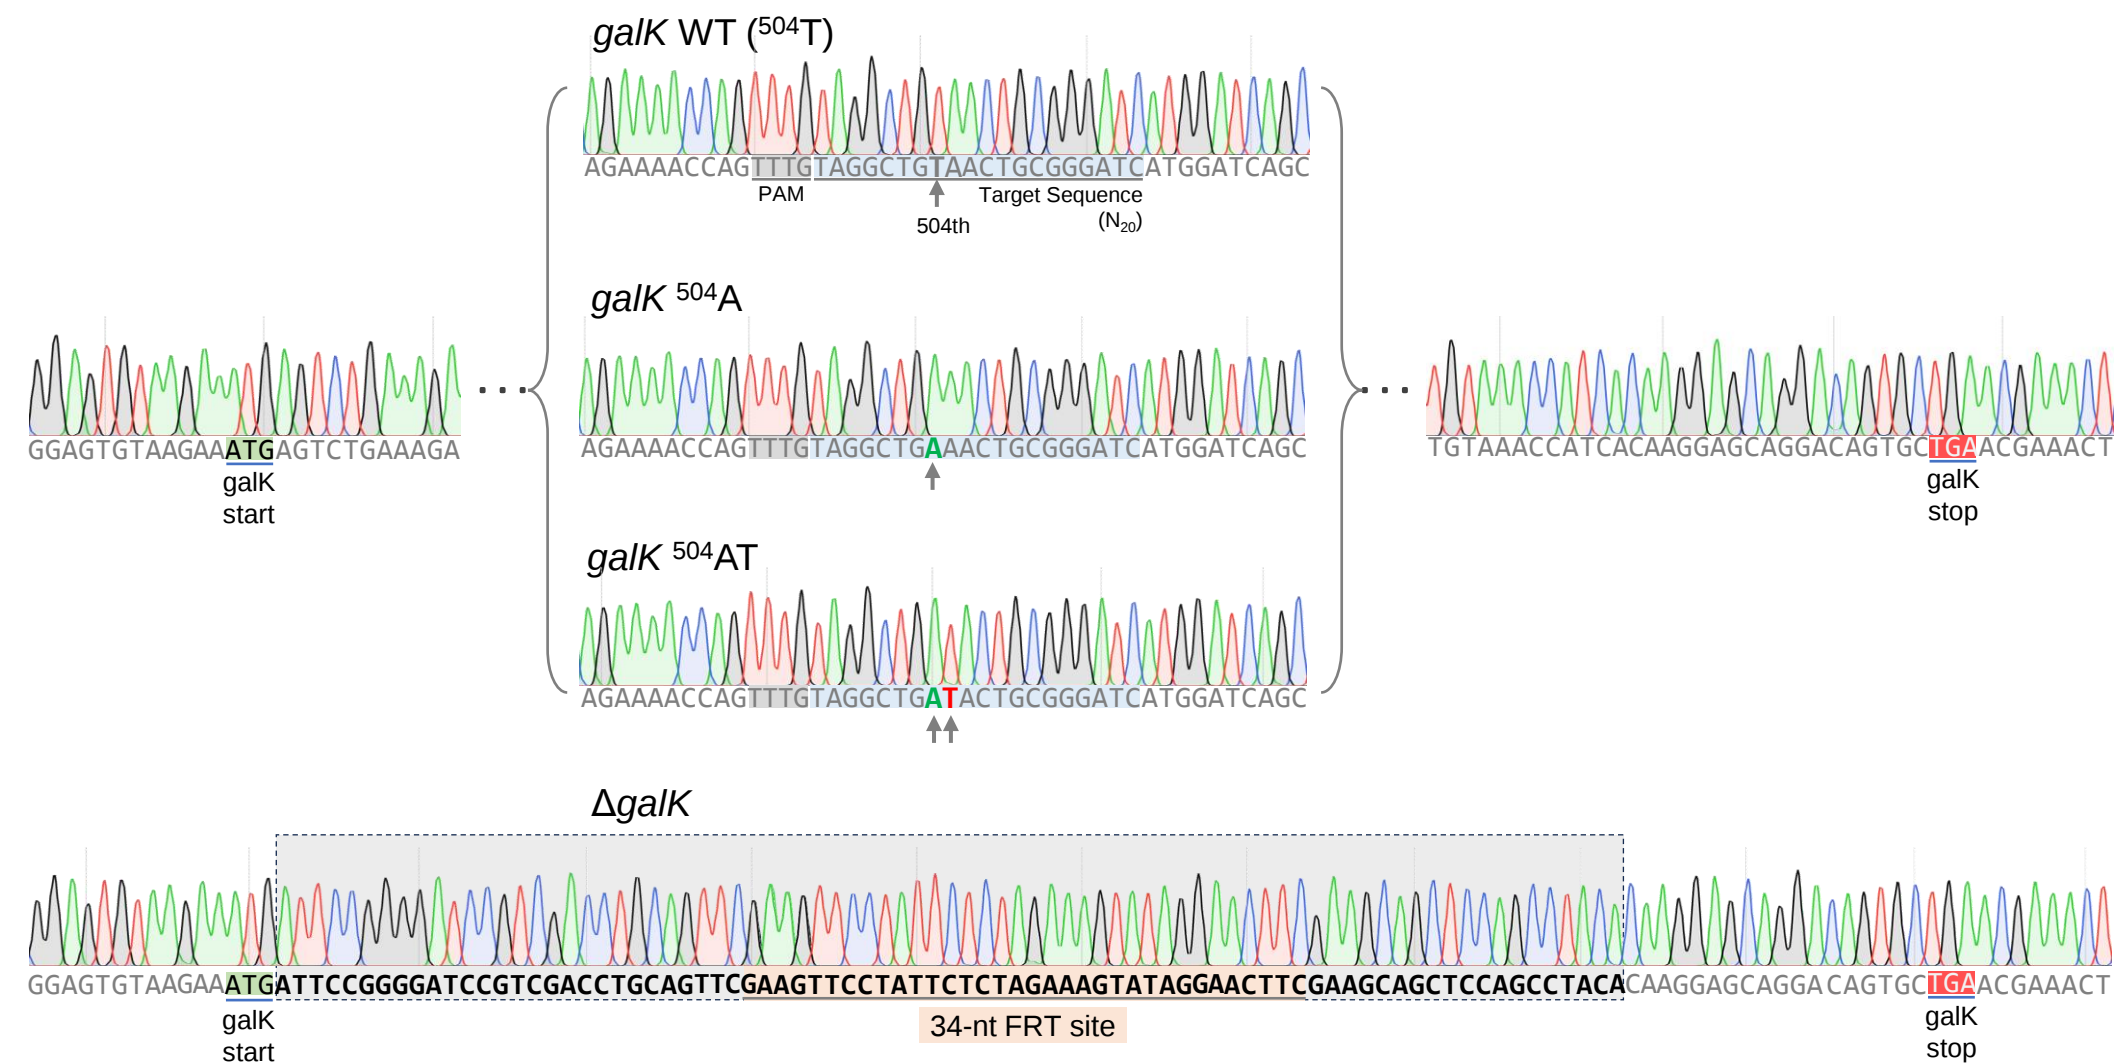

Fig. S2. Sanger sequences of the *galk* mutant strains.

The Sanger sequence confirming the genotype of the *galk* mutant strains is shown. The gray arrows indicate the ⁵⁰⁴T, ⁵⁰⁴A, and ⁵⁰⁴AT variations in the *galk* gene. The gray-shaded region represents the part of the *galk* gene that has been deleted and replaced with a 34-nt FRT site.
