

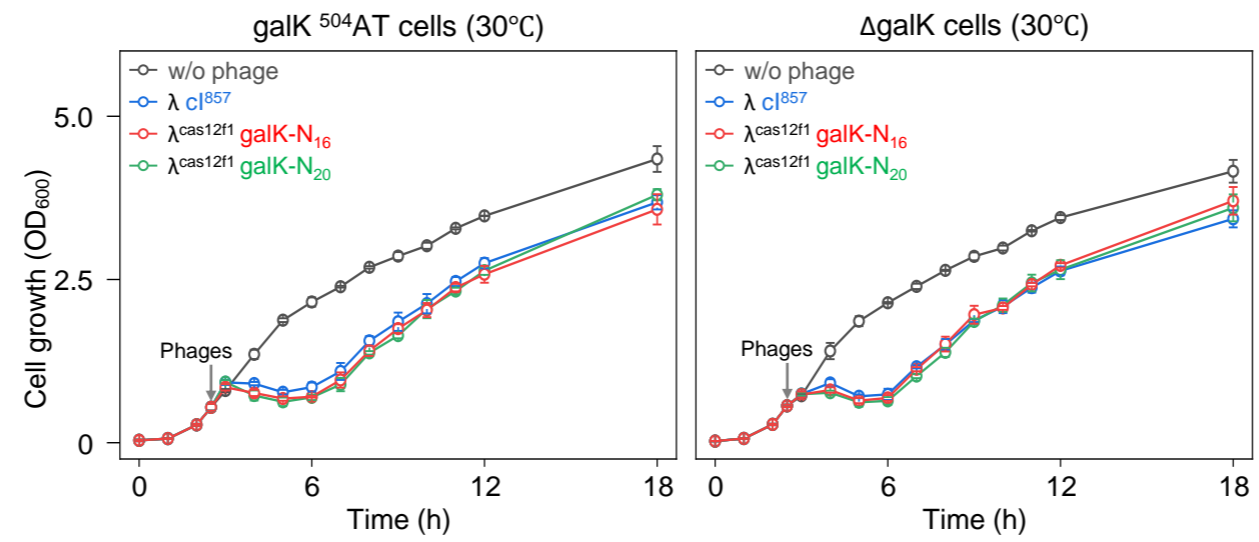

Fig. S7

**Fig. S7.** Growth curves of *galK*<sup>504AT</sup> and  $\Delta galK$  cells infected with  $\lambda$  cI<sup>857</sup>,  $\lambda$  cas12f1 *galK*-N<sub>20</sub>, or  $\lambda$  cas12f1 *galK*-N<sub>16</sub> phages at 30°C.

The gray arrows indicate the time points of phage infection.
